

*An interactive “Infinity and Beyond Panel” is mounted on the wall. This panel has over 40 settings to visually stimulate elders.*

*Arrowsmith  
Health Care  
(2011) Society*

*Plenty of tactile, audio, and visually stimulating objects to play with!*

*200 fiber optic strands cascade from the wall, they slowly change colour and offer both tactile and visual stimulation.*

*People caring for people since 1969*

Welcome to our sensory room...

What is a sensory room? The idea of a sensory therapy room has been used in the Netherlands for many years now. It is a space that creates an environment for our elders as relaxing or as stimulating as they like. It is sort of like a mini-vacation from the real world. Sensory therapy promotes an overall feeling of well-being for those who use it.

In our room you will find an assortment of equipment to delight all the senses.

- Aromatherapy
- Soft music
- Moving pictures
- Water bubbles
- Fiber optics
- Tactile objects
- Weighted blanket
- Interactive objects

Contact our Activity Department if you are interested in learning how to operate the sensory therapy room for a loved one.

If you are interested in donating to our Foundation so we can continue to offer our elders these special programs, please contact Deanna Smith, Administrator of Arrowsmith Lodge.
